### PERSONAL PROJECTS

#### Full Stack - E-Commerce Phone App

Phone e-commerce built with React Native, based on a previous build web page ecommerce to sell video games.

[https://github.com/genti91/e-commerce\\_APP](https://github.com/genti91/e-commerce_APP)

#### Next.js Clothing Store Website

Next.js powered e-commerce clothing store with customer and admin sections. Customer-facing site uses latest Next.js with app directory and Tailwind CSS, while admin section uses Next.js 13 but with page directory and Material UI.

<https://github.com/genti91/clothing-store>

#### Arduino Discord.js Car

Modified old Arduino car, so it can be used with discord.js bot and made custom gripper, camera and sensor mounts, so it can be used throw discord. Seeking to improve programming skills and explore Fusion360

<https://github.com/genti91/ardu-car>

#### Volume Mixer - PC Hardware monitor - Light Control

Arduino hardware volume mixer with LCD display for CPU/GPU temp/usage. Can also control room lights and PC lighting with potentiometers.
